

Where Love Once Stood

By Elva Jones-Hahn

V1

Makes you wonder how we got here
Time has shown us both
The past won't haunt us now
If we hadn't tried
And loving you was the best

Chorus

There's a hole in my heart where love once stood
If there's a chance I should take
Maybe I could
But it all got so complicated
So I turn the page one more time
And stand here waiting
Where love once stood

V2

We had laughs babe and had our fill
And slept into our tears
Our love was true babe and so was life
And it all got in our way

Chorus

There's a hole in my heart where love once stood
If there's a reason I should stay
Maybe I could
But it all got so complicated
So I turn the page one more time
(So I face the truth one more time)
And stand here waiting
Where love once stood
Ooh, ooh, ooh
So let me go now
